This manual is to give a small assistance for using Bermuda CS 8. This manual addresses itself particularly to guys, who have never used Bermuda CS 8 before.

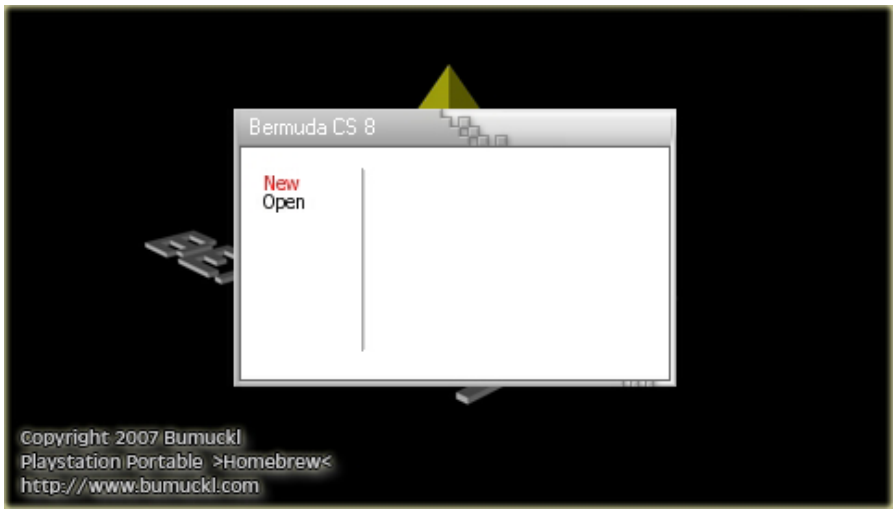
1. Installation

GAME
Copy the whole content of the folder "MS0" into the root of your Memorystick.

GAME150
Copy the whole content of the folder "MS0" into the root of your Memorystick.. Then replace the CONFIG.CFG in the root of your MS with the CONFIG.CFG of the folder "CONFIG_GAME150".

2. The application

Start up Bermuda CS 8. After the PSPSource.de Splash you should see a screen similar to this one:



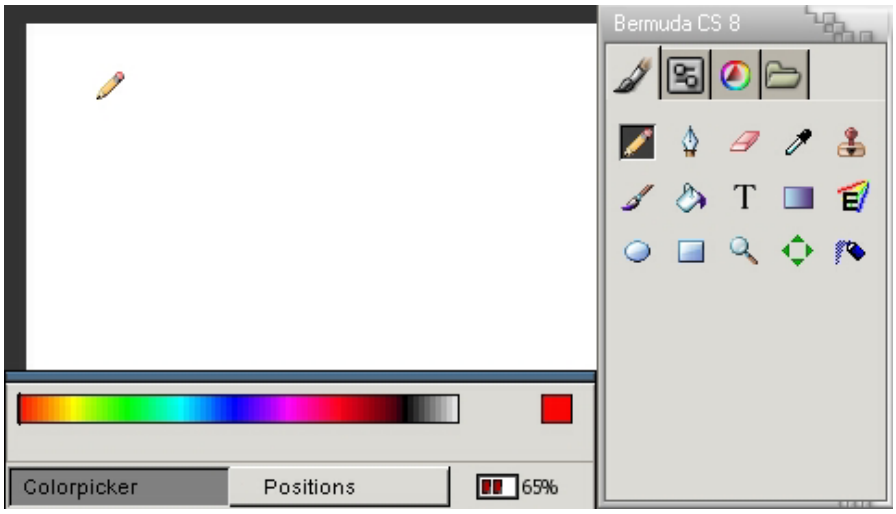
If you want to load a picture, navigate with the arrow keys too "Open" and press X

If you want to create a new, empty picture, navigate too "New" and press X. Now appears a submenu, where you can set the width and/ or the height of the new picture. You can set that by moving also with the arrow keys. Go to "Width", now you can change the width with the right and/or the left arrow key. The same applies to "Height, speaks the height. If you have your desired resolution, go to "OK" and press X. The main program is now started.

Now you are in the actual program.But first something to the functions:

Drawingtools: Pencil, Linetool, Eraser, Pipette, Stamps, Brush, Fill Bucket, Text, Gradient, Effect draw, Circle, Rectangle, Zoom-tool, Move canvas and Graffitisprayer

Settings: Cursorsensitivity, USB, Fontlimit, Brushlimit, CPU-clock
Colors: Colorpicker, Palette, RGB
File: Save as JPG, PNG or Brush, Open a picture, New picture and Exit



Thus the program looks now. At the right edge is the main menue, at the lower edge a small "Taskbar". In order to change between tabs of the main menue, press Start. It is also possible to fade out the menu completely. With SELECT you can switch between the tabs of the "Taskbar" ...

3. Controls

Mainmenue
In the main menue you navigate with the arrow keys. X paints on the canvas and/or uses a tool. You use X as well for functions of other tabs. With 0 you activates the settings of the respective Tools. Thereby you cant navigate in the menue anymore. In addition you must only press triangle...

Taskbar
At the Colorpicker you change the color with the right and/or left shoulder key. At position you activate the preview with the right shoulder-key, with the left shoulder key you deactivates these again.
